

## Including the four pillars of solutions journalism in your application

1. The **RESPONSE** you are covering.
2. What **EVIDENCE** you have about the response's effectiveness, or what evidence you expect to be able to find (we understand that you may gather additional evidence and insight over the course of your project).
3. What **INSIGHTS** you hope to provide on whether this response could work elsewhere or in other contexts.
4. How you will investigate the **LIMITATIONS** and challenges of the response (we understand that you may encounter additional limitations and challenges over the course of your project).
